

Getting started

Step 1: Press the MENU button to turn on the iPod. Place your thumb on the clickwheel and make a clockwise motion to select the Videos tab. Press the white button in the center of the clickwheel.

Step 2: Make a clockwise motion around the clickwheel to select the Video Podcasts tab. Press the white button in the center of the clickwheel.

Step 3: Make a clockwise motion around the clickwheel to select the iTour Bama tab. Press the white button in the center of the clickwheel.

Step 4: Make a clockwise motion around the clickwheel to select the Crimson Promenade tab. Press the white button in the center of the clickwheel. Your tour will begin.

Volume control

Raise the volume by making a clockwise motion on the clickwheel. A counter-clockwise motion will lower the volume. Volume can be adjusted only while a video is playing.

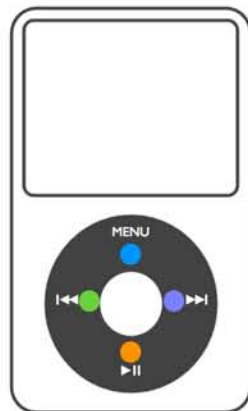

Other controls

MENU: Press to turn on iPod or to return to a previous menu.

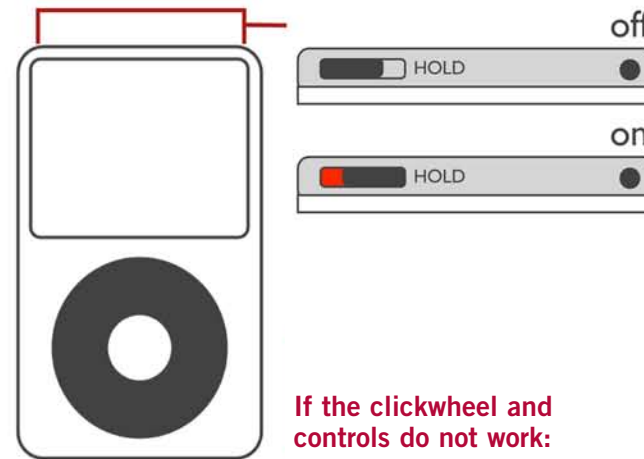

FAST FORWARD: Hold down to fast forward.

PLAY/PAUSE: Press to play or pause. Hold down to turn off iPod.

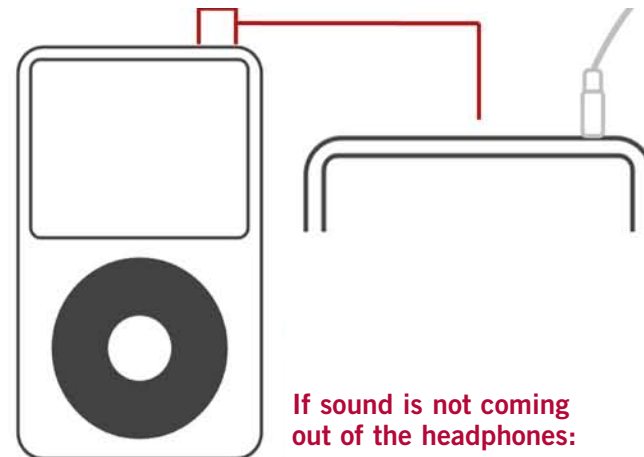

REWIND: Hold down to rewind.

Troubleshooting

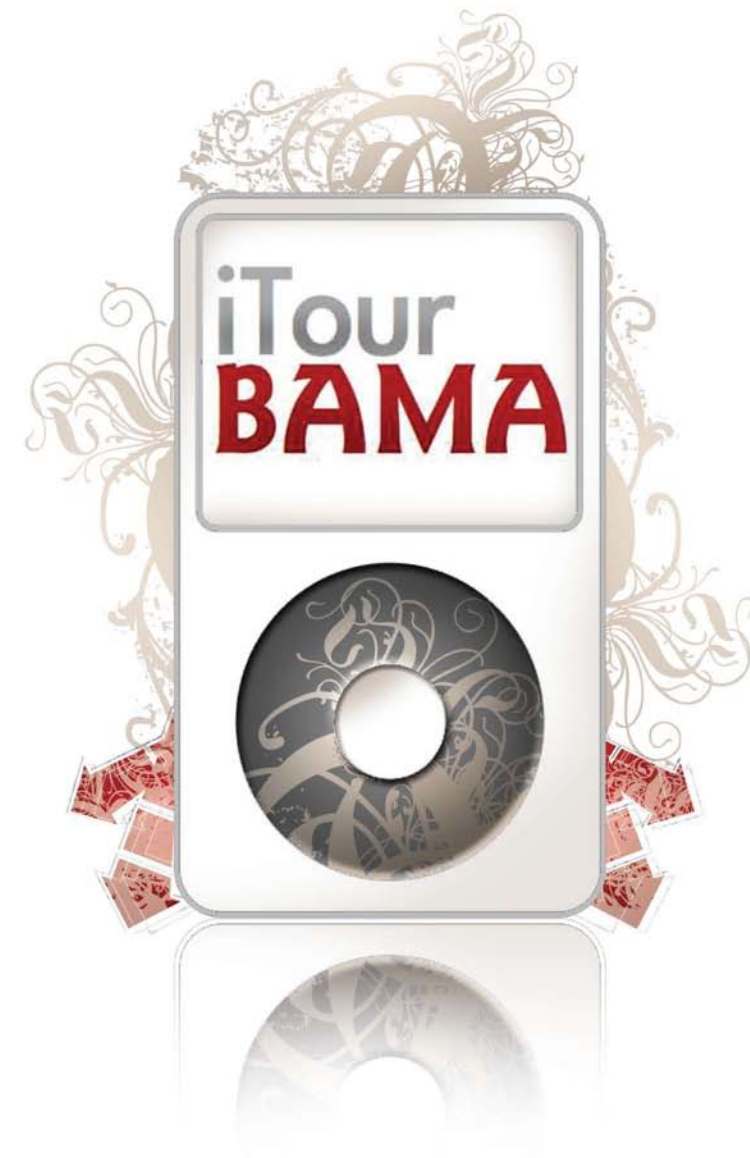

A common reason for unresponsive controls is the HOLD switch. This switch locks the controls on the clickwheel. If the HOLD switch, located on the top of the iPod, has a red strip exposed, then the switch is on. Slide the switch back to the left to turn it off. Your iPod controls should now function properly.

If you have adjusted the volume, and you still don't hear sound, the headphones may not be properly connected. Check the connection of the headphones by pushing the plug, located on the top right side of the iPod, downward. You should now hear sound.

I have a different problem:

Contact the Office of Undergraduate Admissions (tour stop 15 on your map); (205) 348-5666.
